

## Fact sheet (Erasmus+ Program 2024/25)

### Inclusion support

Inclusion support is intended to cover additional financial costs incurred primarily by participants with physical, mental or health impairments. Inclusion support is intended to help participants become mobile.

Instead of a flat-rate payment, the **actual real costs** incurred, for example due to disability or chronic illness, are to be covered.

Inclusion support (based on actual costs) and top-up (flat-rate increase in individual support) can be received at the same time.

The **following groups** can apply for inclusion support:

- Erasmus+ students with fewer opportunities (students with child/children, students with disabilities, students with chronic illnesses)
- Erasmus+ students with fewer opportunities who can prove that they have a real need for additional financial support on a real cost basis

**Application:** The deadline for applications is **three months before the start of your stay**. If you have any questions about the application process or require further information, please contact the Erasmus+ scholarship team ([erasmus.stipendien@univie.ac.at](mailto:erasmus.stipendien@univie.ac.at)) as early as possible.

The additional costs incurred abroad are calculated in comparison to the living and working situation in the sending country. Estimated costs without price research and enclosures cannot be taken into account.

The corresponding *original invoices or electronic invoices* together with *proof of payment and validated tickets* are used for the final settlement of the real costs after the stay.

#### What costs cannot be covered?

- Costs that are covered by (health) insurance. For example: medication, medical treatment, etc.
- Therapy costs: Unless there is proof that the costs in the host country are higher than in the sending country and that the (health) insurance and the deductible to be paid in the sending country do not cover the costs abroad. In this case, the difference can be covered.
- Costs that Erasmus+ participants regularly incur in the country of the sending institution even without mobility. For example: deductible, etc.
- Costs that are covered by other bodies.
- Travel costs of mobile Erasmus+ participants. These are covered by the regular Erasmus+ mobility grant. If higher travel costs are incurred due to the special situation/special needs, funding for the additional costs is possible. If Erasmus+ travel cost support according to the distance band is already available, the costs exceeding the distance band can be covered in this case.
